### HOW TO REPLY TO THIS NOTICE:

#### I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.**

## DETAILED ACTION

1. In an amendment dated, October 29, 2010, Claims 23, 27, 33 and 36 have been amended, claims 1-22, 31-32 and 35 have been canceled. Currently claims 23-30, 33, 34 and 36 are presented for examination.

### ***Response to Amendment***

2. Applicant's amendment filed October 29, 2010, with respect to Claim 23, 27, 33 and 36 has been fully considered and is persuasive. The rejection of Claims 23-30, 33, 34 and 36 has been withdrawn.

### ***Examiner's Statement of Reasons for Allowance***

3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention. **The features of independent claim 23, 27, 33 and 36 directed towards allowable subject matter is "... performing, at a time before actually displaying an image, the steps of: measuring a luminance of light emitted from the backlight through the liquid crystal panel in a plurality of states where the liquid crystal panel has a predetermined transmittance and the backlight has a different luminance, and preliminarily storing the measured luminance of light emitted through the liquid crystal panel as associated with the luminance of the backlight detected by the luminance detecting unit for each of the plurality of states, respectively; and measuring a luminance of light emitted through the liquid crystal panel in each input**

*level, and preliminarily storing the measured luminance associated with an input level which gives the luminance; and subsequently performing, at a time of actually displaying the image, the steps of: setting a desired luminance set value of light emitted through the liquid crystal panel in a state where the liquid crystal panel has a predetermined transmittance; calculating a luminance of the backlight to be detected by the luminance detecting unit which results in the set desired luminance set value of light emitted through the liquid crystal panel, on the basis of the preliminarily stored luminance association in each state; controlling the luminance of the backlight so as to be the calculated luminance; calculating a luminance of light emitted through the liquid crystal panel in each input level and a luminance to be set in each gray level in a case of the luminance set value, on the basis of the stored luminance and input level; ...”.*

*Yamaguchi (US PG Pub 2003/0231161) discloses measuring a luminance of light emitted from the backlight through the liquid crystal panel in a plurality of states (Paragraph 91), where the liquid crystal panel has a predetermined transmittance (inherent) and the backlight has a different luminance (inherent), preliminarily storing the measured luminance of light emitted through the liquid crystal panel as associated with the luminance of the backlight detected by the luminance detecting unit for each of the plurality of states, respectively (Paragraph 105); and setting a desired luminance set value of light emitted through the liquid crystal panel in a state where the liquid crystal panel has a predetermined transmittance (Paragraph 91); calculating a luminance of the backlight to be detected by the luminance detecting unit, which results in the set desired luminance set value of light emitted through the liquid crystal panel, on the basis of the*

Art Unit: 2629

*preliminarily stored luminance association in each state; [(Fig 10 and Paragraph 105 & 115) discloses that the luminance is detected by optical sensor and sent to control section wherein it is compared (calculated) with stored value of the backlight ] and controlling the luminance of the backlight so as to be the calculated luminance (Fig 10 item 86). Further more Yamamoto et al (US PG Pub 2001/0008395)) discloses that measuring a luminance of light emitted through the liquid crystal panel in each input level, (Paragraph 39 line 3-11 discloses optical sensor fitted on the front surface of LCD measures light emitted through the LCD) and preliminarily storing the measured luminance associated with an input level which gives the luminance; calculating a luminance of light emitted through the liquid crystal panel in each input level and a luminance to be set in each gray level in a case of the luminance set value, on the basis of the stored luminance and input level; (Paragraph 39 line 11 – Paragraph 40 line 9).*

But Yamaguchi or Yamamoto et al fails to disclose **performing the steps of:** measuring a luminance of light emitted from the backlight through the liquid crystal panel in a plurality of states and preliminarily storing the measured luminance of light emitted through the liquid crystal panel as associated with the luminance of the backlight detected by the luminance detecting unit for each of the plurality of states, respectively; and measuring a luminance of light emitted through the liquid crystal panel in each input level, and preliminarily storing the measured luminance associated with an input level which gives the luminance, **at a time before actually displaying an image,** and **performing the steps of :** setting a desired luminance set value of light emitted through the liquid crystal panel in a state where the liquid crystal panel has a

Art Unit: 2629

predetermined transmittance; calculating a luminance of the backlight to be detected by the luminance detecting unit which results in the set desired luminance set value of light emitted through the liquid crystal panel, on the basis of the preliminarily stored luminance association in each state; **at a time of actually displaying the image.**

These features in combination with the remaining language of claim 23, 27, 33 and 36 are not taught by the prior art of record. Therefore claims 23-30, 33, 34 and 36 are found to be allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
